Micro Element Plant & Foliar Nutrient

CITRI Crop is a liquid Amino Gluconic Acid chelate mixture, designed to prevent trace element deficiencies during fruit set.

- Conduct a compatibility test with other spray materials such as nutritional supplements by mixing small quantities beforehand. Combined application with Sulphate and Phosphate compounds are not recommended.
- Shake well prior to mixing. Mix with adequate water volume. Never apply as concentrate.
- Keep the container sealed and at temperature below 38°C.
- Store out of reach of children, animals and uninformed people.

Directions for use

(Use only as directed and shake well before use)

The pH of the spray solution must preferably be between 5.0 and 6.5. pH correction must be done with a suitable pH corrector like HidroBuff or Acidifix which is suitable with foliar nutrients.
