Active Ingredients / Aktiewe Bestandele:

Zinc / Sink (Zn) 120 g /kg
Nitrogen / Stikstof (N) 50 g /kg

Gebruiksaanwysings:(Gebruik slegs soos aangedui en skud voor gebruik)
ZINC NITRATE is 'n vloeibare Sink in 'n nitraat stikstof oplossing wat gebruik word as 'n blaarvoeding vir die regstelling van uitermatige Sink tekorte op Sitrus en ander vrugtebome.

Toediening:

50 - 75 ml / 100 ℓ (2 - 4 ℓ / ha) water toegedien tydens lente groei, opgevolg deur 'n tweede toediening gedurende somer indien uitermatige tekorte voorkom.

Voorsorgmaatreels:

- Dien verkieslik **ZINC NITRATE** toe op sy eie.
- **ZINC NITRATE** mag mikro-partikels bevat wat goed in spuitmengsel ingemeng moet word voor gebruik.
- Dien toe in spuitmengsels met pH tussen 5 en 6.

Usage directions: (Use only as directed and shake before use)

ZINC NITRATE is a liquid Zinc in nitrate nitrogen solution applied as a foliar feed for the correction of extreme Zinc deficiencies on Citrus and other tree crops.

Application:

50 - 75 ml / 100 ℓ (2 - 4 ℓ / ha) water applied during Spring Flush, followed up with a second application during the summer if extreme deficiencies persist.

Precautions:

- Preferably apply **ZINC NITRATE** on its own.
- **ZINC NITRATE** may contain micro particles that need to be mixed well in to the spray mixture.
- Apply in spray mixtures at pH levels between 5 and 6.
