JuVigor is a water dispersible powder plant nutrient, designed to prevent and correct nutrient deficiencies and stimulate plant growth.

Active Ingredients :

Nitrogen (N) 253 g/kg
Zinc (Zn) 112,4 g/kg
Manganese (Mn) 37 g/kg
Copper (Cu) 60,5 g/kg
Boron (B) 22,6 g/kg
Molybdenum 1,2 g/kg

Directions for use: (Use only as directed)

- Apply **JuVigor** either in the early morning or late afternoon. Do not spray when temperatures exceed 30 °C or onto plants undergoing moisture stress as this can result in reduced uptake or leaf burn.
- The use of a suitable pH buffer and wetting agent is recommended where required. It is advisable to do a miscibility test prior to mixing **JuVigor** with other products.
- Consult with a qualified agronomist for crop specific information. **JuVigor** should preferably be applied based on recommendations derived from soil and/or foliar analysis.

Recommendations :

Crop	Rate	Application details
Grapes (Table or Wine)	1 kg/100 L Apply 250 – 500 L spray water per hectare	Start application when sufficient leaves are present. Repeat application at 14 to 28 day intervals until sufficient growth has been obtained.
Young Non- Bearing Fruit Trees, Nursery Trees	1 kg/100 L Apply 250 – 500 L spray water per hectare. (Max. Rate 5 kg/ha)	Deciduous Trees: Start application when sufficient leaves are present. Repeat application at 14 to 28 day intervals. Non-deciduous trees: Start application 14 days post transplanting. Repeat application at 14 to 28 day intervals. Apply 4 – 6 applications, or until sufficient growth has been obtained.

For optimum results **JuVigor** should be used in a program and in combination with other balanced fertilizers and foliar feeds and growth supplements.
